

SurfsUp Coding Style Guide

- Tabs for indentation
- Use snake case for variable names
- Use semicolons even if not needed in JS
- Bracket after function or conditional on same line
 - Ex:

```
if(something){
    doSomething();
}
```
- Html delimiters use \${ }
- When using = or == or other comparative symbols put spaces around them
- Use spaces after commas
- No large blocks of blank lines in code
- Don't declare multiple variables in one line
