

Installation Guide

Surfs Up

The Kooks

12/2/18

For Normal Users

1. Go to <http://www.wavefinderusa.com/SurfsUp/default/index>
2. Enjoy the website!

For Developers

1. Download web2py version 2.17
2. Clone the Github directory from <https://github.com/SOSharkie/SurfsUp.git> into the web2py/applications folder
3. In the terminal go to the web2py root folder and run “python web2py.py”
4. This should open the following:

5. Keep the port default, choose a password, then click start server.
6. This will open web2py in your browser, next click on My Sites
7. Now enter the password you chose, and it will take you to a list of the web2py applications
8. Click on SurfsUp, and it will open the local version of the site!
